PROFESSIONAL SUMMARY

Software engineer skilled in Python, Django, and React.js, with hands-on experience building and deploying production-grade web applications. Independently designed and deployed a job portal and a blog platform, each with complete authentication, REST APIs, and MySQL databases, live on Render. ISO 9001:2015 certified in Full Stack Web Development. Also built an AI-driven structural crack detection system combining TensorFlow and IoT sensors.

TECHNICAL SKILLS

- **Languages:** Python
- **Frontend:** HTML5, CSS3, React.js, Bootstrap 5, Responsive & Mobile-First Design
- **Backend:** Django, REST APIs, Authentication & Session Management
- **Database:** MySQL, PostgreSQL, Schema Design, Relational Data Modelling
- **Version Control & Collaboration:** Git, GitHub
- **Deployment & Tools:** Render (Cloud Deployment), VS Code, Postman, JSON

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern — MIST Software Solutions Pvt. Ltd., Coimbatore (ISO 9001:2015 Certified) — 02 Jul 2025 - 02 Aug 2025

Certificate Verified | Reg. No: 922322106040

- Developed 5+ responsive web pages using HTML5 & CSS3, improving cross-device UX across desktop, tablet, and mobile.
- Engineered a reusable UI component library, reducing front-end code duplication by ~40% and cutting development time across modules.
- Integrated Django REST back-end with MySQL — designed schemas, wrote optimised SQL queries, and wired APIs to front-end views.
- Collaborated with Git in a professional team environment.

PROJECTS

Job Portal Web Application | Python, Django, React.js, MySQL — 2025-26

Live: jobportal-1-pibn.onrender.com | GitHub: github.com/Jayasri-0705/Jobportal

- Engineered a full-stack job portal with 3 user roles (admin, employer, job seeker) enabling employers to post jobs and seekers to search, apply, and track applications.
- Built and tested 10+ Django REST API endpoints backed by a MySQL database of 5+ relational models covering authentication, job listings, and application tracking; validated endpoints using Postman with JSON payloads.
- Implemented a responsive React.js front-end across 8+ pages and deployed the full application to production on Render.

Blog Web Application | Python, Django, MySQL, Render — 2025-26

Live: blog-project-0dxk.onrender.com | GitHub: github.com/Jayasri-0705/blog

- Developed a full-stack Django blog supporting role-based access for 2 user types, with secure session-based authentication.
- Implemented complete CRUD operations across 3+ relational MySQL models (posts, categories, comments), including category tagging and a comment system.
- Configured end-to-end deployment on Render, including production settings, static files, and environment variables.

IoT and Deep Learning Structural Crack Detection System | TensorFlow, Python, IoT, Microcontroller — 2025-26

- Designed a real-time AI safety monitoring system using a TensorFlow deep learning model and automated image processing pipeline.
- Integrated IoT sensors to capture and transmit structural images, eliminating manual inspection and improving detection accuracy.

EDUCATION

B.E. - Electronics and Communication Engineering | University College of Engineering, Dindigul (Anna University) — 2022-2026

CGPA: 7.78 / 10

CERTIFICATIONS

- Full Stack Web Development - MIST Software Solutions Pvt. Ltd. (ISO 9001:2015) | 2025 | Reg. No: 922322106040
- Covers: HTML5, CSS3, Bootstrap 5, Python, Django, MySQL, REST API, Git
